Industry Subject Area	Working Group Code	Tri-lateral Detail	National Product Detail			English Title	English Definition	Product Exists in:			NAICS Industries Producing the Product			CPC Code
			Can	Méx	US			Can	Méx	US	Can	Méx	US	
54138	1.0					Testing Laboratory Services	Providing various conformity assessment services such as testing, instrument calibration, product certification, management system registration and commercial inspection services (<i>Canada will substitute "products inspection" in their definition</i>), and other related services such as sale of standards information, consulting, and training. Excludes medical and veterinary testing services, and auto emission testing services; these services are covered by products (xx) (products yet to be classified in the NAICS 62151, Medical and Diagnostics Laboratories, NAICS 541940, Veterinary Services, and NAICS 811198, All Other Automotive Repair and Maintenance industries.)	X	X	X	54138 115110 115210 22111 511 54133 54137 54161 54162 5417 54199 56199 562 61131 81121 81391 81392 91	541380 541610 541330 3345 541620 611310 43-46 53 562 5417 541370 813 93 51	54138 22111 3345 334519 54133 54161 54162 541710 61131 811198 81391 81392 92119 92614 92811	83139 83561 83562 83563 83569 85990 87154 91138 92390 92900 95110 95120
54138	1.1	X				Testing Services	Objectively measuring or evaluating one or more characteristics of a substance or product, according to a specified scientific procedure. A test report is usually issued indicating the results. Covers both laboratory and in field testing. May include related support services such as sample collection. Excludes medical and veterinary testing services, and auto emission testing services; these services are covered by products (xx) (products yet to be classified in the NAICS 62151, Medical and Diagnostics Laboratories, NAICS 541940, Veterinary Services, and NAICS 811198, All Other Automotive Repair and Maintenance industries.)	X	X	X	54138 115210 22111 54171 61131 91	541380 611310 93	54138 22111 541710 61131 811198 92614	83561 83562 83563 83569
54138	1.1.1				X	Agricultural Testing Services	Testing of feeds and forage; fertilizers and lime; manure and compost; plants and seeds; and miscellaneous agricultural products not classified elsewhere. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes testing of agricultural water used for livestock drinking water and irrigation. Testing of agricultural water is covered by product 1.1.2.5, Agricultural Water Testing Services.			X			54138	

* A question mark (?) in columns 9 through 15 indicates that the information is unknown or particularly uncertain at this time.

Provisional Product List for NAICS 541380: Testing Laboratories*

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Industry Subject Area	Working Group Code	Tri-lateral Detail	National Product Detail			English Title	English Definition	Product Exists in:			NAICS Industries Producing the Product			CPC Code
			Can	Méx	US			Can	Méx	US	Can	Méx	US	
54138	1.1.1.1				X	Animal Feed and Forage Testing Services	Performing specific tests on feed and forage samples to determine stage of maturity, nutrients, ratio of legumes to grass, color, odor, and other characteristics. Includes combination and individual tests of alfalfa hay, heat damaged feeds, dry matter, weight, crude fat, crude protein, energy, fiber, amino acids, liquid protein supplement, molasses, mold and mycotoxin, etc. Includes wet chemistry and Near Infrared Red [NIR] Analysis. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes ration and nutritional consulting services [which are primary to Other Scientific and Technical Consulting Services, NAICS 541690] and animal and fowl medications [which are primary to Veterinary Services, NAICS 541940].			X			54138	
54138	1.1.1.2				X	Fertilizer Testing Services	Performing specific tests on fertilizer samples, including lime, to determine their characteristics. Fertilizer tests can be for individual elements or a combination of elements. Includes tests for moisture, nitrogen, phosphate, sodium, sulfate, heavy metal screens (lead, cadmium, magnesium) and so forth. Tests for limestone may include testing for calcium, magnesium, moisture, sieve analysis, and total neutralizing value. Includes dry and wet samples. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.1.3				X	Manure and Compost Testing Services	Performing specific tests on manure, sludge, and compost specimens to determine the fertilizer and lime value. Includes tests of solid and liquid samples for electrical conductivity, moisture percent, ash content and nutrients. Poultry litter, dairy and swine lagoon effluents, feedlot and stable manure, composted manure and other organic amendments are frequently tested. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	

* A question mark (?) in columns 9 through 15 indicates that the information is unknown or particularly uncertain at this time.

			Can	Méx	US			Can	Méx	US	Can	Méx	US	
54138	1.1.1.4				X	Plant Testing Services	Performing specific tests on plant specimens, including leaf and petiole, to determine their characteristics. Includes testing for plant disease and nutrient status. Nutrient analysis may include DRIS [Diagnosis and Recommendation Integrated System] analysis as well as tests for levels of nitrogen, phosphorus, potassium, sulfur, calcium and so forth. Disease analysis may include ELISA [enzyme-linked immunosorbent assay] and hybridization tests. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.1.5				X	Seed Testing Services	Performing specific tests on seed specimens to determine their characteristics. Includes tests for germination, purity, moisture, weight, vigor, health, disease, and noxious weed content. Tests also include seed-borne disease tests for fungi, bacteria and viruses, and herbicide tolerance tests. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.1.6				X	Other Agricultural Testing Services, n.e.c	Performing other agricultural testing, not classified elsewhere. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.2				X	Water Testing Services	Performing specific tests on water samples including drinking water, wastewater, groundwater, storm water, and agricultural water. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.2.1				X	Drinking Water Testing Services	Performing specific tests on drinking water samples for safety, taste, odor, color, corrosivity, staining, and hardness. Includes tests for such items as chloroform bacteria, E-coli bacteria, general inorganic, sulfate, radon, sodium, fluoride, pH, hardness, metals [including lead, copper, iron, manganese, and cadmium], pesticides, herbicides, nitrates and radon. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	

* A question mark (?) in columns 9 through 15 indicates that the information is unknown or particularly uncertain at this time.

Provisional Product List for NAICS 541380: Testing Laboratories*

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Industry Subject Area	Working Group Code	Tri-lateral Detail	National Product Detail			English Title	English Definition	Product Exists in:			NAICS Industries Producing the Product			CPC Code
			Can	Méx	US			Can	Méx	US	Can	Méx	US	
54138	1.1.2.2				X	Wastewater Testing Services	Performing specific tests on municipal and industrial effluent samples for such elements as heavy metals, major ions, organic carbons, phenolics, general inorganics, biological and chemical, oxygen demand, and bacteriologists. Includes tests of wastewater discharge, sanitary and storm sewers, septic field monitoring, pulp and paper effluent and metal production discharge, and power generating facility discharge. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.2.3				X	Groundwater Testing Services	Performing specific tests on well water specimens for contaminants including pesticides, herbicides, metals, volatiles, and semi-volatiles. Includes testing of water hardness, conductance, turbidity, and bacterial contamination. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes well drilling and set up of monitoring wells.			X			54138	
54138	1.1.2.4				X	Storm Water Testing Services	Performing specific tests for oil, grease, pH, and volatile organic substances found in storm water runoff. Samples are taken and tests are made of the initial storm water runoff, and of flow-weighted composite samples for the duration of the storm, and average levels of concentration are determined. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.2.5				X	Agricultural Water Testing Services, including Irrigation Water and Livestock Drinking Water	Performing specific tests on water samples to determine the water's suitability for livestock drinking water, irrigation, aquaculture, and other agricultural uses. Includes tests for nutrients, electrical conductivity, dissolved solids, hardness, sodium, absorption ratio, pH, and potassium. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.2.6				X	Other Water Testing Services, n.e.c	Performing specific tests on water samples, not elsewhere classified. Includes testing of seawater and surface or ambient water such as lakes, rivers, and streams. Includes tests for water temperature, chlorides, dissolved oxygen, fecal coliform bacteria, phosphorus, pH, nitrates, and iron. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	

* A question mark (?) in columns 9 through 15 indicates that the information is unknown or particularly uncertain at this time.

Industry Subject Area	Working Group Code	Tri-lateral Detail	National Product Detail			English Title	English Definition	Product Exists in:			NAICS Industries Producing the Product			CPC Code
			Can	Méx	US			Can	Méx	US	Can	Méx	US	
54138	1.1.3				X	Air Testing Services	Performing specific tests on airborne materials. Includes testing of indoor air quality, ambient air quality, fugitive emissions and source emissions. Excludes vehicle emission testing; these services are covered by product x.x.x. in NAICS 811198, All Other Automotive Repair and Maintenance industries (has not yet been classified.) Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.3.1				X	Indoor Air Quality Testing Services	Performing specific tests on indoor air samples for pollutants including gases (organic and inorganic), particles, or microbials. Includes tests for air flow velocity, temperature, relative humidity, particulates, heavy metals such as lead, settled dust, spores, pollen, fibers, animal hair, lead particulate, nicotine, carbon dioxide, carbon monoxide, chemicals, and other contaminants. Includes purchased test kits if returned to lab for assessment, as well as professionally administered tests. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.3.1.1				X	Radon Testing Services	Performing specific tests to determine radon concentrations in the air in homes, apartment and office buildings. Includes purchased test kits if returned to lab for assessment, as well as professionally administered tests. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes testing of radon concentration in water.			X			54138	
54138	1.1.3.1.2				X	Sick Building Testing Services	Performing specific tests for pollutants found in "sick buildings." Services primarily include, but are not limited to, testing of the indoor building air. May include other related testing, such as of carpets and wall coverings in the building, examination of the building's ventilation system, and analysis of blood samples from building occupants for chemical contamination. For example, includes testing of allergens, toxic vapors, mold, spores, pollen, particulates, silicon dust, and volatile organic compounds. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes remediation activities.			X			54138	

* A question mark (?) in columns 9 through 15 indicates that the information is unknown or particularly uncertain at this time.

			Can	Méx	US			Can	Méx	US	Can	Méx	US	
54138	1.1.3.1.3				X	Other Indoor Air Quality Testing Services, n.e.c	Performing other indoor air quality testing services, not elsewhere classified. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.3.2				X	Ambient Air Quality Testing Services	Testing to determine ambient air quality, such as tests for such items as ozone, sulfur dioxide, nitrogen oxides, carbon monoxide, lead, suspended particles, and acid rain. Includes permanent and short term monitoring using fixed sites and mobile laboratories. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.3.3				X	Source Emission Testing (Stack Testing) Services	Performing specific tests on source emission samples, such as testing of emission samples from fossil fueled power plants, municipal waste combustors, medical incinerators, and uncontrolled manufacturing processes. Includes tests for velocity, pressure, flow, temperature, particulate matter, and regulated compounds such as carbon dioxide, carbon monoxide, metals, nitrous oxides, oxygen, ozone, and hydrocarbons. Includes one-time and continuous monitoring. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.4				X	Soil and Rock Testing Services	Performing specific tests on soil and rock specimens to determine their characteristics. Includes testing of soil and rocks for agricultural, environmental, engineering, construction, geotechnical, and all other purposes. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes testing of soil and rock designated to be hazardous waste, which is covered by product 1.1.7, Hazardous Waste Testing Services.			X			54138	

* A question mark (?) in columns 9 through 15 indicates that the information is unknown or particularly uncertain at this time.

			Can	Méx	US			Can	Méx	US	Can	Méx	US	
54138	1.1.4.1				X	Soil and Rock Testing Services, Agricultural	Performing specific tests on soil and rock specimens to determine their characteristics specifically as they relate to agricultural purposes. Includes tests for organic matter, pesticide content, and trace elements. Major nutrients tested include nitrogen, phosphorous, potassium and sulfur. Examples of tests include the Mehlich and Bray P-1. Various combinations of tests may be performed at the client's request, for various fees. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes environmental and other soil and rock testing services. Environmental soil and rock testing is classified in product 1.1.4.2. Soil and rock testing other than for agricultural or environmental purposes is classified in product 1.1.4.3. Excludes testing of soil and rock designated to be hazardous waste, which is covered by product 1.1.7, Hazardous Waste Testing Services.			X			54138	
54138	1.1.4.2				X	Soil and Rock Testing Services, Environmental	Performing specific tests on soil and rock specimens to determine their characteristics specifically as they relate to environmental purposes. For example, testing to determine whether or not soil or rock specimens contains harmful elements and compounds and possible hazards. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes agricultural and other soil and rock testing services. Agricultural soil and rock testing is classified in product 1.1.4.1. Soil and rock testing other than for agricultural or environmental purposes is classified in product 1.1.4.3. Excludes testing of soil and rock designated to be hazardous waste, which is covered by product 1.1.7, Hazardous Waste Testing Services.			X			54138	

* A question mark (?) in columns 9 through 15 indicates that the information is unknown or particularly uncertain at this time.

			Can	Méx	US			Can	Méx	US	Can	Méx	US	
54138	1.1.4.3				X	Other Soil and Rock Testing Services (excludes Agricultural and Environmental Soil Testing)	Performing specific tests on soil and rock specimens, not elsewhere classified. Includes testing of soil and rocks for engineering, construction, geotechnical and other purposes. Includes identification and classification of soil samples, bearing capacity, compaction and consolidation characteristics, soil sieve analysis, soil aggregate analysis, and permeability. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes agricultural and environmental soil testing services. Agricultural soil testing is included in product 1.1.4.1. Environmental soil testing is included in product 1.1.4.2. Excludes testing of soil and rock designated to be hazardous waste, which is covered by product 1.1.7, Hazardous Waste Testing Services.			X			54138	
54138	1.1.5				X	Sludge Testing Services	Performing specific tests on industrial and municipal sludge specimens. Includes tests for pathogens [such as bacteria, viruses, and parasites], heavy metals [such as arsenic, cadmium, chromium, copper, lead, mercury, nickel, and zinc], industrial toxins [such as PCB's, pesticides, xylene, toluene, benzene, asbestos and dioxin], nitrogen, agricultural minerals [phosphorous, potassium, sulfur, calcium, magnesium, sodium, and iron], pH, and oxygen uptake rate. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes testing of sludge designated as hazardous waste, which is covered by product 1.1.7, Hazardous Waste Testing Services.			X			54138	
54138	1.1.6				X	Solid Waste Testing Services	Performing specific tests on municipal, industrial and special waste specimens to determine selected characteristics of the waste, including confirming the nonhazardous nature of the waste. Includes tests for cyanide, volatile organic compounds, acid extractable, pesticides, PCB metals [mercury and cadmium], petroleum hydrocarbons and sulfides. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes testing of sludge designated to be hazardous waste, which is covered by product 1.1.7, Hazardous Waste Testing Services.			X			54138	

* A question mark (?) in columns 9 through 15 indicates that the information is unknown or particularly uncertain at this time.

			Can	Méx	US			Can	Méx	US	Can	Méx	US	
54138	1.1.7				X	Hazardous Waste Testing Services	Performing specific tests on hazardous [including radioactive] waste and hazardous mixed waste to determine the kind and degree of contamination by hazardous substances such as acidic solutions, cyanide, mercury, flammable liquids, and hazardous metals. Mixed waste may include liquids, sludge, debris and soil. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.8				X	Insecticide and Pesticide Residue Testing Services	Performing specific tests to determine and quantify the presence of residual insecticides and pesticides on raw agricultural products, processed foods, plant tissues, soils, and water. Includes Multi-residue Screens and Specific Pesticide analysis. Analysis includes wet, dry and solvent testing. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.9				X	Asbestos Testing Services	Performing specific tests to identify and determine the amount of asbestos in a sample. Includes tests of mastic, vinyl asphalt tiles, asphalt shingles, and roofing materials. Techniques include, for example, polarized light analysis, electronic microscope, and airborne cartridge analysis. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes remediation.			X			54138	
54138	1.1.10				X	Acoustic and Noise Testing Services	Performing specific tests to measure community, industrial, and environmental noise such as that generated by industrial plants, construction sites, highways, airports, railroads, and machines. Also includes tests of sound absorption, impedance, attenuation, emitted sound and hearing protection. Includes laboratory testing and field testing using temporary and semi-permanent noise monitoring systems.			X			54138	
54138	1.1.11				X	Food Testing Services	Performing specific tests on food samples to determine their characteristics. Tests performed may include assessments of safety; physical quantity; shelf-life; sanitation; nutrition; genetically modified organisms [GMO]; and taste. Includes pet food testing. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes animal feeds and forage, which are covered in product 1.1.1.1, Animal Feed and Forage Testing Services.			X			54138	

* A question mark (?) in columns 9 through 15 indicates that the information is unknown or particularly uncertain at this time.

			Can	Méx	US			Can	Méx	US	Can	Méx	US	
54138	1.1.11.1				X	Food Safety Testing Services	Performing specific tests to measure and evaluate food safety. Includes microbiological and chemical testing for pathogens such as bacteria, viruses, and parasites; pesticides such as fungicides, insecticides and herbicides; contamination from insects or rodents; evidence of genetic modification; and evidence of irradiation. Includes physical testing, nutritional analysis and labeling evaluations. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.11.1.1				X	Chemistry Testing Services for Food Products, including Nutritional Labeling	Performing chemistry testing services related to food products. Includes nutritional labeling, proximate analyses, fats and oils analysis, preservatives and additives analysis, minerals analysis, antibiotic content analysis, carbohydrates analysis and pesticide, herbicide and fungicide analysis. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.11.1.2				X	Microbiological Testing Services for Food Products	Performing microbiological testing related to food products. Includes testing for pathogens, indicator and spoilage organisms, culture identification, toxins and microbial metabolites. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes testing for evidence of genetic modification, which is covered by product 1.1.11.1.4, Genetically Modified Organism Testing Services.			X			54138	
54138	1.1.11.1.3				X	Extraneous Matter and Filth Testing Services for Food Products	Performing specific tests on food samples for extraneous matter and filth, including extraneous matter, foreign material identification, Howard mold count, identification of hairs and stored product pests, light filth, macroscopic exams, shell counts, and stem counts. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.11.1.4				X	Genetically Modified Organism Testing Services	Performing specific tests to detect, identify and quantify genetically modified organisms (GMO) in foods. GMO testing is used to detect and quantify the presence of GMOs, and to identify specific GMO varieties. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	

* A question mark (?) in columns 9 through 15 indicates that the information is unknown or particularly uncertain at this time.

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Industry Subject Area	Working Group Code	Tri-lateral Detail	National Product Detail			English Title	English Definition	Product Exists in:			NAICS Industries Producing the Product			CPC Code
			Can	Méx	US			Can	Méx	US	Can	Méx	US	
54138	1.1.11.1.5				X	Other Food Safety Testing Services, n.e.c	Performing other food safety testing, not elsewhere classified. For example, includes testing to determine whether or not a food specimen has been subjected to irradiation and if so, to analyze the specimen for nutritional labeling and safety considerations. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.11.2				X	Food Shelf Life Testing Services	Performing specific tests to determine the shelf life of a food product by studying product-package interaction over time. Tests are conducted to confirm the stability, quality, and safety of a food product during distribution and storage. May include comparing the effects of processing and/or formulation changes on product safety and quality, selecting optimum packaging and/or storage conditions for a product, identifying relatively unstable raw materials which may limit final product shelf life, identifying potential spoilage, safety or degradation problems during the preliminary stages of product development and establishing optimum storage conditions for costly or perishable raw materials. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.11.3				X	Other Food Testing Services, n.e.c	Performing other food testing services, not elsewhere classified. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.12				X	Paper and Paper Products Testing Services	Performing specific tests on paper and paper products. Tests may include strength [tensile, burst, tear, fold endurance, board strength], surface characteristics [roughness, purity, sizing], optical properties including brightness, structural characteristics; also pulp properties and purity [disintegration, fiber strength and length, water retention, and ash content]. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	

* A question mark (?) in columns 9 through 15 indicates that the information is unknown or particularly uncertain at this time.

			Can	Méx	US			Can	Méx	US	Can	Méx	US	
54138	1.1.13				X	Wood and Wood Products Testing Services	Performing specific tests on wood and wood products. Includes wood; wood charcoal; cork and articles of cork; pulp of wood or of other fibrous cellulosic material; and wood products such as plywood, panels, and particleboard. Tests are for such considerations as physical properties, structural performance, product certification, formaldehyde, ultra-violet rays, short and long term 'creep', and freeze-thaw. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes forestry products such as live trees, which are included in product 1.1.1.6, Other Agricultural Testing Services, n.e.c. Excludes wood furniture, which is covered by product 1.1.26.			X			54138	
54138	1.1.14				X	Container and Package Testing Services	This service includes pre-shipment evaluation of containers and packaging through simulation of rail, truck, piggyback, air and ship transportation under all atmospheric conditions. Containers and packaging may include corrugated and solid fibreboard containers; wood crates; pallets; steel and plastic pails and drums; tin plate, aluminum and fibre cans; glass and plastic jars; and paper and foil bags. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.15				X	Elastomers and Protective Coatings Testing Services	Performing specific tests on elastomers and protective coatings, such as plastics, rubbers, resins, adhesives (organic resins), glues, paints and coatings, and sealants. Tests may include environmental aging, mechanical testing, thermals analysis, chemical analysis, physical testing, nondestructive evaluation and failure analysis. Includes testing and formula reconstruction; compound development and testing services; and certification testing to established standards. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	

* A question mark (?) in columns 9 through 15 indicates that the information is unknown or particularly uncertain at this time.

54138	1.1.15.1				X	Plastics, Rubbers, and other Elastomer Products Testing Services	Performing specific tests on plastics, rubbers, and other elastomer products. Tests may include environmental aging, mechanical testing, thermals analysis, chemical analysis, physical testing, nondestructive evaluation and failure analysis. Includes testing and formula reconstruction; compound development and testing services; and certification testing to established standards. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.15.2				X	Paints, Veneers, Adhesives and Sealants Testing Services	Performing specific tests on paints, veneers, adhesives, and sealants. Includes varnishes, shellacs, enamels, and waterproofing materials. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.16				X	Composite Materials Testing Services	Performing specific tests on composite materials. Composites are broadly known as reinforced plastics. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.17				X	Nonmetallic Minerals and Products Testing Services	Performing specific tests on nonmetallic minerals including bituminous materials, coal, tar, cement, asbestos products, concrete, lime, gypsum, soil and rock, building stones, aggregates, sand, ceramics, clay and clay products, glass and glass products, semiconductor materials and devices, petroleum refinery products including asphaltic materials, petrochemicals, and lubricants, petroleum crudes, natural gas, oil shale and tar sands. Includes laboratory and field testing. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.17.1				X	Coal and Coke Testing Services	Performing specific tests on coal and coke. Includes physical, rheological, petrographic, and chemical testing of coal and coke, as well as trace and ultra trace elemental analyses. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	

* A question mark (?) in columns 9 through 15 indicates that the information is unknown or particularly uncertain at this time.

54138	1.1.17.2				X	Petroleum and Petroleum Products Testing Services	Performing specific tests on natural gas, petroleum crudes and refined petroleum products, such as oil shale and tar sands, asphalts, road oils, tars, crude oils, fuels, lubricants, additives and solvents. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.17.3				X	Other Nonmetallic Minerals and Products Testing Services	Performing specific tests on other nonmetallic minerals and products, not elsewhere classified. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.18				X	Metallic Minerals and Products Testing Services	Performing specific tests on metallic minerals and products including metallic ores and powders; ferrous alloys and steels; nonferrous metals and alloys; stainless alloys including nickel and chromium; primary metals including bar, sheet, pigs, and ingots; reactive and refractory metals; metallic coatings, metallic fasteners; semifabricated metallic products including extrusions and rolled sections; and cast, forged, welded, and pressed metallic components. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.19				X	Construction Materials Testing and Inspection Services	Performing specific testing and inspection services to evaluate characteristics of construction materials and to monitor and evaluate their use at a construction site. Includes testing and inspection of acoustical materials; architectural construction materials; bituminous paving and paving mixtures; concrete; fireproofing; foundations; masonry; mastics and sealants; roofing materials; structural soil fills, subgrade preparation and base materials; soil compaction; structural steel; and other construction materials. Inspections may include foundation, soil compaction, structural steel, reinforced steel, weld, concrete and masonry, fireproofing, asphalt and pavement, roofing materials and their placement, and other construction material inspections. Inspections include any laboratory or field testing required to complement the inspection activity. Services may be performed in the laboratory or in the field. Includes miscellaneous support services, such as sample collection.			X			54138	

* A question mark (?) in columns 9 through 15 indicates that the information is unknown or particularly uncertain at this time.

54138	1.1.20				X	Machinery and Equipment Testing Services	Performing specific tests on machinery, equipment, supplies and appliances. Includes electrical and electronic devices and equipment; boilers, pressure vessels and pipework; transportation vehicles and equipment; machinery and mechanical appliances; energy equipment and appliances; and other machinery and equipment. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.20.1				X	Electrical and Electronic Machinery, Equipment, Supplies and Appliances Testing Services	Performing specific tests on electrical and electronic products. Includes components and assemblies; communications and telecommunications equipment and systems; electrical appliances; information technology equipment including electrical business equipment; motor-operated electrical equipment; electromechanical components for electronic equipment; mechanical structures for electronic equipment, optoelectronics and laser equipment; photographic and related equipment; scientific equipment; laboratory apparatus and supplies. Testing services include product safety testing, intrinsic safety evaluation, and leakage tests. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.20.2				X	Boilers, Pressure Vessels, and Pipework Testing Services	Performing specific tests on boilers, pressure vessels, and pipework. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.20.3				X	Transportation Vehicles and Equipment Testing Services	Performing specific tests on transportation vehicles and equipment. Includes railway vehicles, road vehicles, aircraft and spacecraft, ships, boats and floating structures. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.20.4				X	Other Machinery and Equipment Testing Services, n.e.c	Performing specific tests in areas of machinery and equipment not elsewhere specified. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138

54138	1.1.21				X	Textile Testing Services	Performing specific tests on textiles and finished textile products, including textile mill products; men's, women's and children's apparel; and other finished textile products; and geotextiles such as filter fabrics, support membranes and erosion control cloth. Textile and clothing tests include specific tests for colorfastness, shrinkage, fiber composition, flammability, weathering, construction (fabric weight, count, yarn size and twist), physical properties (abrasion, strength, and permeability), and performance. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.22				X	Footwear, Leather, and Leather Products Testing Services	Performing specific tests on footwear, leather, and leather products. Footwear testing may include sole bond adhesion strength, seam strength, heel attachment, flex cracking, wear tests, fit assessment and safety footwear testing. Leather and leather goods testing may include physical testing such as tensile, stitch bear, tongue bear strength, stretchiness, grain crack and bursting strength, compressability and resilience, hydro thermal stability, abrasion resistance, water proofness, flexural endurance test, light fastness, rub fasters, real and apparent density, air and water vapour permeability and other tests. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection.			X			54138	
54138	1.1.23				X	Housewares Testing Services	Performing specific tests on housewares including cookware, ceramicware, enamelware, kitchen utensils, and other similar items. Includes laboratory and field testing services. Includes miscellaneous support services related to			X			54138	
54138	1.1.24				X	Toys, Children's Products and Promotional Premiums Testing Services	Performing specific tests on toys, children's products and promotional premiums. Includes laboratory and field testing services. Includes miscellaneous support services related to provision of the testing services, such as sample collection. Excludes children's apparel,			X			54138	
54138	1.1.25				X	Sporting Goods and Recreational Equipment Testing Services	Performing specific tests on sporting goods and recreational equipment, such as bicycles, helmets, baseballs, basketballs, golf equipment and other sports and recreation equipment. 			Can	Méx	US			Can	Méx	US	Can	Méx	US	
54138	1.3	X				Product Certification Services	Providing third-party assurance, either at a point in time or on a continuous basis, that a product conforms to an established standard or specification. Includes the issuance of a conformity certificate and/or certification marks.	X	X	X	54138 81391 81392 91	541380 93 813	54138 81391 81392 926140	83569 85990 91138 95110 95120
54138	1.3.1				X	Initial Product Certification Services	Initial product certification services consist of an in-depth assessment of a product with the dual goal of providing third-party assurance that the product conforms to an established standard or specification at a given point in time and establishing the groundwork required for recurring product certification. The third-party conducts an assessment of the product that may include initial inspection, batch testing, and/or 100 percent testing. Includes the issuing of a conformity certificate.			X		541380, 93 y 813 (si existiera el producto)	54138 81391 81392 926140	83569 85990 91138 95110 95120
54138	1.3.2				X	Recurring Product Certification Services	Recurring product certification services consist of third-party assurance that a product which has been found by the third-party to conform to an established standard or specification at a given point in time will continue to be produced in conformance with the established standard at future points in time. The third-party conducts an assessment of the product that may include surveillance of the supplier's process, audit testing, field investigations, batch testing, and/or 100 percent testing. Includes the issuing of a conformity certificate and/or certification marks.			X		541380, 93 y 813 (si existiera el producto)	54138 81391 81392 926140	83569 85990 91138 95110 95120
54138	1.3.3				X	One-Time Product Certification Services	One-time product certification services include third-party assurance that a product conforms to an established standard or specification at a given point in time. The third-party conducts an assessment of the product that may include initial inspection, batch testing, and/or 100 percent testing. Includes the issuing of a conformity certificate which is valid for only the specific product. This service provides full certification on one			X		541380, 93 y 813 (si existiera el producto)	54138 81391 81392 926140	83569 85990 91138 95110 95120
54138	1.4	X				Management System Registration Services	Providing third-party assurance that quality management systems (also referred to as quality assurance or quality control systems), environmental management systems, and other management systems conform to the requirements of an established management standard. The system is registered, not a product, and an official registration certificate is issued for the certified system.	X	X	X	54138 54161	541380 541610 93	54138 54161 54162 81392 92811	83569 85990 91138 95110 95120
54138	1.5	X				US title: Commercial Inspection Services CAN title: Products Inspection Services	Providing third-party assurance that the characteristics and handling of products meet client-specified requirements at any one or more stages of the production process, including preproduction, and/or during the shipping, loading, and unloading phases. May include the issuing of a report or certificate.	X	X	X	54138 115110 56199 54199 911240	541380	54138	83569 85990 91138 95110 95120
